

Smart Tips

- **Rinse your mouth with water prior to every test to remove any contaminates**
- Do NOT disconnect head unit if ignition is on
- Be sure to take retest before shutting off engine if retest is requested
- If you fail an initial test, take the retest after the 5 minute timer expires
- Be sure to bring your new driver license to your first calibration
- NC puts you into lockout mode with one (1) violation – you must return to one of our locations before the 96 hour countdown expires after the violation happened
- NC in most cases sets the calibration at 0.00 – this requires utmost caution in products used or consumed prior to blow
- You may calibrate no more than 5 days prior to your scheduled lockout date
- Client is responsible for any and all readings recorded by the device
- If your vehicle is being worked on – have the service center call the 800 number for information and assistance
- Along with the PINK copy of the **lease agreement**, you must provide **the Ignition Installation Notice Certificate** and **Client Checklist** to the DMV.
- Call 1-800-880-3394 with any questions or concerns
