

SETTING UP THE IN-HOM SMART MOBILE UNIT:

1. Connect the power supply cord to the IN-HOM S.M.A.R.T. Mobile device (figure 1) and plug it into an electrical outlet. The unit will activate and the LCD will display “**Initializing**,” and then “**Ready**”.
2. If the battery is completely dead, it may take a few minutes to initialize the device.
3. Place the mouthpiece in the nozzle found on top of the IN-HOM S.M.A.R.T. Mobile device as show in figure 2.
4. The IN-HOM S.M.A.R.T. Mobile device transfers data through a cellular connection. It is your responsibility to place your device in an area with a good cellular signal. See your user manual for more details regarding cellular signal strength.

Figure 2 – Mouthpiece installation

HOW TO TAKE A TEST:

1. Make sure the display shows “**Ready**” or “**Test Required**.” (see images below). **Smart Start recommends drinking WATER before each test to ensure a clean mouth.**
2. Take a deep breath and blow steadily into the mouthpiece until the device stops beeping and you hear a click. During the test, the display will show the word “**Testing – Keep Blowing**.”
3. After testing, the display will show “**Analyzing – Please Wait**,” or other messages listed that indicate an incomplete test (see next page).

Active Test Window Display

Ready (out of test window)

Reminders:

- See figure to the right to ensure the correct face-to-camera position
- Drink water prior to every breath test to ensure a clean mouth.
- Make sure you have good lighting in the room
- Do not use a breath freshening agent before taking a test as most of these contain alcohol.
- It is a violation of your program for another person take a test on your device.
